The success of the DFD Annual Meeting means that the gathering in Washington DC is likely to be the largest to date. With this continued growth come logistical challenges and the need for the DFD membership to reflect on the format of the meeting.

This feedback will help the DFD Annual meeting better cater for early career members, ensuring a welcoming and worthwhile event for junior and/or new members of the APS DFD community (Thanks to Navid Hooshanginejad, DFD EC Early Career Member-at-large).
